### PINUS

**sylvestris**, H. B. Special  
Scots Pine .... \$1.50 \$5.00

### HERBST BROTHERS' SPECIAL SCOT'S PINE

is the product of the most painstaking tree-breeding in the last 200 years of practical forestry.

### FOR STRAIGHT- GROWING TREES

**General Data:** These trees grow from 65 to 98 feet high and attain an age of 66 to 120 years.

Knots usually on upper third of trunk—lower two-thirds clear.

Needles 2 3-10 inches to 3 1-10 inches long—borne in very heavy clusters.

Color of needles: deep green from September to April—a trifle lighter from May to August.

Seedlings reach a height of 4 to 6 inches in first year—growth thereafter, 11 to 25 inches yearly.

### It's Fast Growing and Good

Please remember that ALL "H. B. SPECIAL SEED" are gathered from trees—never from the ground.

The climber's equipment consists of: a half-bushel cone-bag slung across the shoulders; a light-weight 8 to 10 foot pole with a hooked end for drawing in the cone-bearing branches for ease in picking; and the usual lineman's climbers.
